

CALL FOR PROPOSAL

What is DevConf.CZ looking for?

Choose your session format

● **Talk**

● **Discussion**

● **Workshop**

● **Contest**

● **Meetup**

● **Booth**

Present, discuss, gather the community, showcase your latest findings, organize the contest, get creative. We're open to new ideas!

Have a look at the detailed description of each format at devconf.info/cz

Decide for preferred time frame

20 / 40 min

A talk can be either 20 or 40 minutes long, make sure you reserve time at the end for Q&A. If speakers wish to continue with the Q&A after their time slot, there will be a dedicated place for it. Feel free to recruit your colleagues to interact with people in chat while you are talking!

Think of opensource-themed topic

ML / AI / Big Data
Desktop Kernel IoT Frontend / UI / UX
Cloud and Containers Community
Developer Tools Microservices Virtualization Documentation
Networking **Agile, DevOps & CI/CD**
Fedora Security / IdM Quality & Testing
Middleware **Immutable OS** Debugging/Tracing
Platform / OS Storage/ Ceph/ Gluster

...and many more! Technical and non-technical topics welcome. Your creativity is the limit.

Pre-record your session or go live

We give speakers a choice to speak live or send us a pre-recorded session. We understand pre-recording your session requires extra time and extra set of skills and we are currently considering ways to make it easier for you. If you choose to pre-record your session, remember it only needs to be as good as you would do live.

All levels of experience welcome!

We want to hear from you whether you're a first time speaker or a seasoned pro. All it matters is your passion and enthusiasm about open source
